

Predicting the Safety and Effectiveness
of Inferior Vena Cava Filters

David L. Gillespie MD, RVT, FACS, DMCC

David L. Gillespie, MD, RVT, FACS, DMCC is the lead vascular surgeon and co-principal investigator on the PRESERVE (**PRE**dicting the **S**afety and **E**ffectiveness of Inferio**R** **V**ena Cava Filters) study.

Dr. Gillespie is chief of the department of Vascular and Endovascular Surgery, Cardiovascular Care Center at Southcoast Health System & Southcoast Hospitals Group, Fall River, Mass. Previously, he served as the chief of the Division of Vascular Surgery, Department of Surgery at the University of Rochester, where he earned three awards for teaching.

Prior to that, Dr. Gillespie served as a military surgeon, caring for soldiers on the frontlines in Afghanistan and Iraq. In addition, Dr. Gillespie was chief and program director of Vascular Surgery at Walter Reed Army Medical Center, and served as a vascular surgery consultant to the U.S. Surgeon General from 2001 to 2008.

Dr. Gillespie is board certified by the American Board of Surgery in Vascular Surgery. He attended medical school at the Uniformed Services University of the Health Sciences. He received his training in General and Vascular Surgery at Boston University. He is an adjunctive Professor of Surgery at the Uniformed Services University Bethesda, MD. He is a member of the AOA medical honor society, the Society for University Surgeons, Society for Vascular Surgery, and the American Venous Forum. He was editor of the Yearbook of Vascular Surgery and a distinguished editor for the Journal of Vascular Surgery and the European Journal of Vascular Surgery. He has written and published over 200 peer-reviewed manuscripts, abstracts and book chapters and has given nearly 300 podium presentations at national meetings on vascular surgery.
