

Predicting the Safety and Effectiveness
of Inferior Vena Cava Filters

Matthew S. Johnson, MD, FSIR

Matthew S. Johnson, MD, FSIR is the lead interventional radiologist and co-principal investigator on the PRESERVE (**PRE**dicting the **S**afety and **E**ffectiveness of Inferio**R** **VE**na Cava Filters) study.

In addition, Dr. Johnson serves as director of clinical research and director of interventional oncology in the Department of Radiology and Imaging Sciences at Indiana University Health in Indianapolis. He is also a professor of radiology and surgery at Indiana University School of Medicine. Since joining the Indiana University School of Medicine in 1994, Dr. Johnson has also served for many years as the chief of vascular and interventional radiology and as chairman of one of the five Indiana

University Institutional Review Boards before taking on his current appointments.

He is a graduate of the University of Michigan Medical School in Ann Arbor and performed his residency in diagnostic radiology at Loyola University in Chicago. He completed his fellowship in interventional radiology at the Johns Hopkins University School of Medicine in Baltimore. Dr. Johnson is a Fellow of the Society of Interventional Radiology (SIR) and a member of SIR's Executive Council.
